SUMMARY

Final-year Computer Science undergraduate (CGPA 9.22) with hands-on experience building full-stack applications using **Java, Spring Boot, and the MERN stack**. Skilled in designing REST APIs, relational and NoSQL data models, and responsive UIs, with a strong grounding in **Data Structures, Algorithms, OOP, DBMS, and Operating Systems** and writing unit, integration and **API tests with JUnit**, **Mockito**, **AssertJ** and **Postman**. Proven ability to independently ship end-to-end projects, from authentication and authorization to AI-integrated features.

EDUCATION

Walchand Institute of Technology, Solapur — B.Tech, Computer Science & Engineering | CGPA: 9.22 **Sept 2023 – June 2027**
Walchand College of Arts and Science, Solapur — Higher Secondary Certificate (HSC) | 81.83% **Feb 2023**

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, C, HTML/CSS
Frameworks & Libraries: Spring Boot, Spring Security, React.js, Node.js, Express.js
Databases & Tools: MySQL, MongoDB, Mongoose, Git, GitHub
Testing & Automation: Test case design, API testing (Postman), JUnit5, Mockito, AssertJ, Unit & Integration Testing, Bug Reporting
Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

DataAnnotation — AI Data Annotator **Sept 2025 – Present**

- Evaluated AI-generated responses across multiple projects for **factual accuracy**, relevance, **reasoning**, instruction following, and overall **response quality** using defined evaluation criteria.
- Contributed to AI model training and improvement by rating responses, identifying errors, and providing structured feedback based on project-specific guidelines.
- Applied critical thinking and attention to detail to compare alternative responses, assess quality across evaluation parameters, and maintain consistent annotation standards.

Infosys Springboard Virtual Internship **Nov 2025 – Jan 2026**

- Built **CivicPulse Hub**, a grievance redressal and feedback platform, to help citizens report and track resolution of civic issues.
- Designed the application using **Java, Spring Boot, React.js, and MySQL** following REST API best practices.

PROJECTS

JalSathi — AI-Powered Groundwater Decision Support System | *Python, PyTorch, FastAPI, Node.js, React.js* **Oct 2026**

- Built an AI-powered groundwater forecasting system using an **LSTM model** to predict 30, 60, and 90-day groundwater levels.
- Integrated **groundwater telemetry**, historical rainfall, location metadata, and **IMD weather data** with validation, outlier checks, and feature engineering.
- Developed a **decision-support API** and dashboard providing **groundwater scores**, reliability indicators, **trend analysis**, area-level reports, and use-case advisories for irrigation, borewell planning, industry, and construction

PixelStream — AI-Powered Video Sharing Platform | *Node.js, Express.js, MongoDB, React.js* **Sept 2026**

- Built a YouTube-style video hosting and social platform with **JWT authentication, bcrypt security**, and protected routes.
- Designed scalable MongoDB schemas (**Mongoose**) for uploads, likes, comments, subscriptions, and watch history APIs.
- Integrating an **AI "Ask Anything" feature** using video transcripts to power context-aware Q&A per video.

Hindustan Besan Mill — Production & Expense Tracker | *Node.js, Express.js, MongoDB, React.js* **Aug 2026**

- Built a full-stack production and expense management system with **JWT authentication**, **bcrypt-hashed** passwords, and complete CRUD for production, worker payments, raw materials, and bills with search, filter, and **pagination**.
- Enforced all financial totals as **backend-computed**, treating the frontend as untrusted input to guarantee data integrity across every report and dashboard.
- Designed Daily, Date-Range, and Monthly reports with Recharts visualizations, **PDF/image export**, and print support, plus correct IST (Asia/Kolkata) business-date handling for late-night entries.

UN Vote Explorer — Diplomatic Data Intelligence Dashboard | *Spring Boot, React.js, MySQL* **May 2026**

- Built a dashboard visualizing 75+ years of UN voting records across 193 member states and 5,000+ resolutions.
- Engineered a **Country Similarity Score engine** and Regional Bloc Analysis module with country-level trend charts.
- Developed **Country Profile dashboards** with 10-year Yes-vote trend charts, GDP growth, import/export line charts, and a full country-specific resolution voting log.

CivicPulse Hub — Smart City Feedback & Redressal System | *Spring Boot, React.js, MySQL* **Nov 2025**

- Implemented **role-based authentication/authorization** (Spring Security + JWT) for Citizens, Admins, and Officers.
- Built a complaint resolution workflow with deadline alerts, mandatory proof-image uploads, and **automated email** notifications.
- Added a post-resolution feedback loop with asynchronous API calls and robust error handling for a responsive UX.

CERTIFICATIONS

Java Foundation Certification — Sept 2025
Programming with Generative AI, NPTEL (IISc Bangalore) — Aug–Oct 2025
Soft Skill Development, NPTEL (IIT Kharagpur) — Jan–Mar 2025
3rd Prize, Urdu Article Writing, Solapur University — Mar 2026
Research Methodology, NPTEL (IIT Madras) — Jul – Oct 2026
